Consumer Price Index, Midwest Region – February 2015

Prices in the Midwest up 0.3 percent in February but 0.5 percent lower over the year

The Consumer Price Index for All Urban Consumers (CPI-U) in the Midwest rose 0.3 percent in February, following four consecutive monthly declines, the U.S. Bureau of Labor Statistics reported today. The monthly increase was largely attributable to an 11.3-percent advance in motor fuel prices. Overall, the energy index was 3.8 percent higher. The indexes for food (-0.1 percent) and all items less food and energy (0.1 percent) registered little movement over the month.

The CPI-U for the Midwest declined 0.5 percent from February 2014 to February 2015. Food prices increased 2.6 percent and the energy index, which includes motor fuel and household fuels, fell 19.3 percent. Excluding food and energy, the CPI-U rose 1.3 percent over the year. (See [chart 1](#).)

Chart 1. Over-the-year percent change in CPI-U, Midwest region, February 2012–February 2015

Food

Food prices in the Midwest were little changed (-0.1 percent) in February. The index for food at home declined 0.3 percent while costs for food away from home rose 0.2 percent.

From February 2014 to February 2015, the index for food increased 2.6 percent. Rising costs for food at home (2.2 percent) and food away from home (3.3 percent) both contributed to the yearly advance.

Energy

The energy index turned up 3.8 percent in February following seven consecutive monthly declines and had the greatest upward impact on the all items index. Motor fuel prices rebounded 11.3 percent, the largest one-month gain since February 2013, after falling a total of 46.6 percent over the prior seven months. Costs for utility (piped) gas service and electricity were down 4.5 and 0.6 percent, respectively, over the month.

Despite the monthly increase, the index for energy fell 19.3 percent from February 2014 to February 2015, led by a drop of 33.1 percent in motor fuel prices. Costs for utility (piped) gas service were 9.4 percent lower over the year, while electricity prices advanced 5.0 percent.

All items less food and energy

The index for all items less food and energy for the Midwest registered little movement (0.1 percent) in February due to offsetting movements. Expenditure categories registering higher prices over the month included shelter (0.1 percent) and new and used motor vehicles (0.5 percent). In contrast, medical care services (-0.5 percent) and recreation (-0.4 percent) were among the expenditure categories posting lower prices over the month.

The index for all items less food and energy increased 1.3 percent from February 2014 to February 2015. Higher costs for shelter (2.2 percent) and medical care (2.3 percent) led the advance.

The Midwest Consumer Price Index for All Urban Consumers (CPI-U) stood at 222.301 in February 2015. A typical market basket of goods and services that cost \$100.00 in the 1982-84 base period cost \$222.30 in February 2015. Because regional CPI data are not adjusted for seasonal price variation, consumers and businesses should be cautious in drawing conclusions about long-term retail price trends from short-term changes in the regional indexes.

CPI-W

In February, the Midwest Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) was 217.027, up 0.4 percent over the month. The CPI-W decreased 1.1 percent over the year.

The March 2015 Consumer Price Index for the Midwest region is scheduled to be released on Friday, April 17, 2015.

Technical Note

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 89 percent of the total population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers approximately 28 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Each month, prices are collected in 87 urban areas across the country from about 6,000 housing units and approximately 24,000 retail establishments--department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index.

The index measures price changes from a designated reference date (1982-84) that equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period "market basket" of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65. For further details see the CPI home page on the Internet at www.bls.gov/cpi and the BLS Handbook of Methods, Chapter 17, The Consumer Price Index, available on the Internet at www.bls.gov/opub/hom/homch17_a.htm.

In calculating the index, price changes for the various items in each location are averaged together with

weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Because the sample size of a local area is smaller, the local area index is subject to substantially more sampling and other measurement error than the national index. In addition, local indexes are not adjusted for seasonal influences. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. NOTE: **Area indexes do not measure differences in the level of prices between areas; they only measure the average change in prices for each area since the base period.**

The Midwest region is comprised of Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; Federal Relay Service: 1-800-877-8339

⁽¹⁾ This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

⁽²⁾ Index is on a December 1982=100 base.

⁽³⁾ Indexes on a December 1997=100 base.

⁽⁴⁾ Special index based on a substantially smaller sample.

⁽⁵⁾ Indexes on a December 1993=100 base.

Regions defined as the four Census regions. Midwest includes Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

NOTE: Index applies to a month as a whole, not to any specific date. Data not seasonally adjusted.

⁽¹⁾ This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

⁽²⁾ Index is on a December 1984=100 base.

⁽³⁾ Indexes on a December 1997=100 base.

⁽⁴⁾ Special index based on a substantially smaller sample.

⁽⁵⁾ Indexes on a December 1993=100 base.

Regions defined as the four Census regions. Midwest includes Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

NOTE: Index applies to a month as a whole, not to any specific date. Data not seasonally adjusted.
